## MAXLITE OPENS NEW FACILITY IN ANAHEIM

LIGHTING INNOVATOR EXPANDS ASSEMBLY AND TESTING CAPABILITIES WITH LEED-CERTIFIED BUILDING

MaxLite expanded its U.S. operations with the opening of a new LEED-certified facility on October 20, 2014.

The 48,864-square-foot-building increases MaxLite's product assembly and testing capabilities and features the company's first full showroom on the West Coast. Located in the Anaheim Concourse development at Ocean Circle, the \$7.5 million new construction is outfitted entirely with energy-efficient MaxLite LED lighting products. The building, which

was developed by Panattoni Construction Company, received Leadership in Energy and Environmental Design (LEED) certification from the U.S. Green Building Council for following best-in-class green building strategies and practices.

"The expansion of our West Coast assembly operations and testing facilities marks the beginning of an exciting chapter of growth for MaxLite," said President and CEO Yon Sung. "Our new Anaheim building and its capabilities will play a key role in

strengthening MaxLite's position as one of the easiest companies to work with in the industry. Achieving LEED certification further supports our company's commitment to sustainability and energy efficiency."

MaxLite chose the new construction in response to increased product demand and a pledge to offer the highest level of product testing and quality assurance. By mov-

ing from its previous home in Rancho Cucamonga, MaxLite is able to operate three full product assembly lines, enabling the company to get products into the hands of its customers quicker than ever before. The additional warehouse space also allows the company to stack and move product more efficiently, streamlining the picking process.

MaxLite deepens its commitment to product quality and customer service with the expansion of its West Coast testing facilities. The company's Anaheim laboratory is expected to achieve full recognition by Underwriters Labora-

tories (UL) by May 2015. This will enable MaxLite to perform its own testing to UL standards, as well as perform testing for its partners. The company is also in the process of expanding its West Caldwell, NJ headquarters to include a National Voluntary Laboratory Accreditation Program (NVLAP)-certified testing facility. To achieve these certifications, the company must pass stringent requirements showing its capability of handling and testing products.

Mark successfully completes his final lift at 116 kilograms to take the gold medal.

## MARK SCHLUETER OF MCGEE COMPANY TAKES GOLD MEDAL AT MASTERS NATIONAL OLYMPIC WEIGHTLIFTING COMPETITION

The Masters National Olympic Weightlifting Competition took place for the first time on the west coast. It was held in Monrovia April 9 through 13 at the Marriott.

Mark Schlueter, president of McGee Com-

pany in Santa Fe Springs, competed in the 55-59 age and 105 kilogram weight category. Mark took the National Championship and the gold medal on his last lift of the day. Recording a personal record in both the snatch and clean

and jerk, he went on to set a personal 'total record' of 203 kilograms.

McGee Company is located at 10513 Hathaway Drive, Santa Fe Springs, CA 90670, and can be contacted at 562-789-1777, or online at: [www.mcgeeco.com](http://www.mcgeeco.com).
